METEOROLOGISCHE GEGEVENS OMTRENT DE

OOSTKUST VAN SUMATRA IN 1933

door

C. H. ten CATE

Secretaris van het Deli Proefstation.

In deze publicatie zijn de meteorologische gegevens opgenomen, welke door het Deli Proefstation gedurende het jaar 1933 werden verzameld en verwerkt. Het aantal regenstations, dat op het eind van 1932 nog 385 was, nam in den loop van 1933 met 16 stations af; echter kwamen er 7 nieuwe bij (Aloer Gading II, Bandar Lampahan, Goenoeng Melajoe II, Goenoeng Pamela, Houtind. Mij. Langkaf, Kwala Pessilam en Lao Kawar), zoodat per ult. December 1933 het totaal aantal regenstations 376 bedroeg.

Onder de maandcijfers en de totalen van het jaar 1933 staan cursief gedrukt de veeljarige gemiddelden.

In het vervolg zullen de meteorologische gegevens niet meer als Mededeeling verschijnen, gelijk tot dusverre het geval was, doch als Bulletin.
